This document is the result of various interactions with stakeholders, both internal and external. The content of this SDBIP flows from the IDP and our Budget. The SDBIP is a practical “hands on” document that provides immediate insight into the workings of our Municipality.

This SDBIP document will assist us to:

- improve our service delivery;
- harness our expertise and potential to more effectively clear all bottlenecks that slows down service delivery;
- monitor and review the performance of the Municipality against real and measurable targets;
- report to the public on the performance of the Municipality.

We are mindful that we need to deliver at a pace which echoes the commitment that we made to our people.

Councillor SJ Ngonyama
Executive Mayor

Section 1 of Municipal Finance Management Act defines the SDBIP as:

"a detailed plan approved by the mayor of a municipality in terms of section 53 (1)(c)(ii) for the implementing of the municipality's delivery of services and the execution of its annual budget and which must indicate –

(a) projections for each month of –

(i) revenue to be collected, by source; and

(ii) operational and capital expenditure by vote;

(b) service delivery targets and performance indicators for each quarter;

...”

The attached SDBIP is a lower layer detailed plan to assist management in the implementation of the budget and with delivery in terms of the organizational strategic objectives.

The SDBIP is essentially a management implementation tool of the budget and it inter alia assists with:

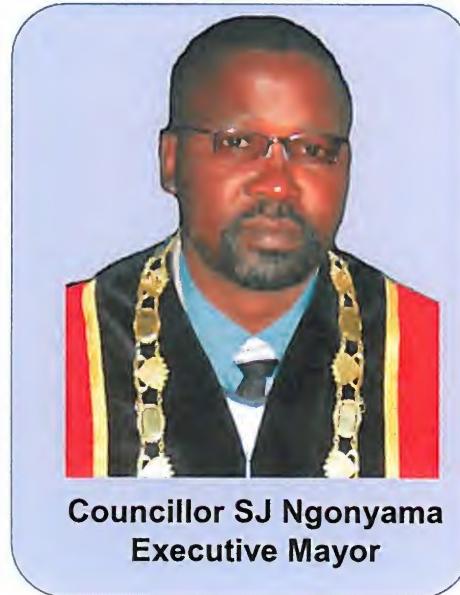

- Indicating the responsibilities and the outputs for each of the senior managers
- Determining the performance agreement of the Municipal Manager and other senior managers
- Developing managers to be better problem solvers as they continually look out for anticipated problems
- Helping Council and the community to be able to monitor performance of the Municipality
